

Soumaïla NIAMPA

General Engineer – Data, AI

☎ +212 708-778-658 ✉ soumaila.niampa@centrale-casablanca.ma 🔗 [linkedin.com/in/soumaïla-niampa](https://www.linkedin.com/in/soumaïla-niampa)

General engineer specialized in data science and digitalization, with a background spanning materials engineering, complex systems, and AI. I currently work as a Data Analyst in a banking environment, where I design operational steering dashboards, gather business requirements, write functional, and support decision-making.

Education

École Centrale Casablanca

General Engineering Degree – Major in Data Science & Digitalization

Sep. 2022 – Sep. 2025

Casablanca, Morocco

- Core engineering curriculum, including materials behaviour and structural mechanics
- Complex Systems Engineering track: system architecture, modelling and multi-agent simulation
- Data Science & Digitalization major: machine learning, deep learning, NLP, statistics, data engineering
- Management, project management, sociology of organizations

École Polytechnique de Ouagadougou

CPGE – Computer Science & Telecommunications

Sep. 2019 – Jul. 2022

Ouagadougou, Burkina Faso

Work experience

Attijariwafa Bank

Data Analyst

Nov. 2025 – Present

Casablanca, Morocco

- Built operational dashboards and wrote technical and functional specifications for reporting systems
- Modeled business processes using BPMN notation

Saham Bank : End-of-Studies project

Data Engineer (Internship)

Apr. – Sep. 2025

Casablanca, Morocco

- Built a data processing framework for the migration of card payment data
- Designed data pipelines and a medallion architecture using Spark, PySpark and DBT

BBC & Partners

Assistant Engineer (Internship)

May – Aug. 2024

Ouagadougou, Burkina Faso

- Developed a text and voice virtual assistant using RASA NLU, allowing users to query daily tasks from a CRM using natural language
- Trained intent classification models and integrated operational REST APIs

Choubel Consulting

Full-Stack Developer (Internship)

Jul. – Aug. 2023

Casablanca, Morocco

- Built an e-commerce platform with PayPal integration and a user-centered checkout flow

Key projects

Financial Data Lakehouse Pipeline

Spark, Airflow, Minio, Nessie, Python

- Built an end-to-end pipeline extracting financial market data, transforming it to Parquet, and storing it in a Minio-based lakehouse via the Nessie catalog, orchestrated with Airflow

RAG System for External Knowledge Sources

Python, LLM APIs, Vector Search

- Built a retrieval-augmented generation architecture combining vector indexing and LLM APIs, evaluated with generative AI metrics (RAGAS)

Skills

Data & Systems

Data Engineering: Spark, Airflow, Minio, Nessie, NiFi
Analysis: Python (Pandas), SQL
Visualization: Power BI
Process modelling: BPMN

AI

Machine Learning: deep learning, NLP
Conversational AI: RASA, Botpress
Generative AI: RAG, vector search, LLM APIs

Soft skills

Autonomy
Teamwork
Adaptability

Languages

French: Advanced (DALF C1)
English: Intermediate B2 (Cambridge Linguaskill)
